

## GM63A Portable Digital Vibration Measurement Instrument Vibration Meter

### Introduction

This product adopts piezoelectric effect of artificial polarized ceramic for design, it is suitable for monitoring of all kind of vibration mechanical facility, specially the vibration measurement of rotating and reciprocating machinery. The unit can measure acceleration, velocity and displacement, which is widely used in mechanical manufacture, electric power metallurgy and general aviation etc. Field.

### Features

Visually displays measurement value and state  
Acceleration, velocity and displacement measurement  
Different vibration frequency selection  
High sensitivity probe for accurate measurement  
Provides long and short probe head each one, is suitable for different situation measurement.  
Equipped with AC signal output interface  
Low power indication function  
Auto power-off function  
LCD backlight  
Simple to use, the structure is compact, portable for carrying along with measurement.
